Security Aspects in Computer Science and its Applications (SACSA-2022)

October 17 – 21, 2022

(Sponsored by ISEA – II Phase)

Objective

The objective of the program is to bring awareness in the teaching fraternity, who in turn nurture the budding engineers, about the importance and means of information security as well as empower them to safeguard the interest of the nation against cyber-crime by bringing together eminent researchers, educators, engineers and practitioners in the field under one

Tentative topics to be covered

Issues and Challenges
Cryptography
Security in Wireless Networks
Digital Forensics
Web Application Security
Blockchain Technology
Security in Cloud Computing and IoT

Take away of the course

The FDP will provide the knowledge about the tools and methods used to secure data and computer resources that are vulnerable to security threats with emphasis on practical aspects. This will help the teaching fraternity in further exploring the specific security domains and will empower them to meet the challenges in the respective domains. Further, they will be able to disseminate the knowledge among budding researchers, and practitioners for the benefits to the society.
